Maojet and Codasip Join Forces to Deliver RISC-V Processors to Taiwan

Campbell, California – September 10ᵗʰ, 2018 – Codasip, the leading supplier of RISC-V® embedded processor IP, today announced that it has signed a representative agreement with Maojet Technology Corporation, making them Codasip's exclusive sales partner in Taiwan.

Maojet is the leading EDA tool and IP distributor in Taiwan, established in 1992 and having since built a comprehensive portfolio of EDA tools from system level to RTL, manufacturing and PCB, in addition to a large family of silicon-proven SoC IP solutions.

"We are witnessing growing RISC-V momentum in Taiwan, as our customers are always looking for new and innovative IP," said Ted Tsai, General Manager of Maojet. *"The combination of Codasip's RISC-V processors and processor development tools is unique to the industry, and exactly what our customers need to differentiate in the highly competitive semiconductor market. We anticipate a long and successful partnership with Codasip."*

"Taiwan is home to some of the world's most innovative semiconductor companies and represents a huge opportunity for Codasip technology," stated Jerry Ardizzone, Vice President of Worldwide Sales at Codasip. *"Together, Maojet and Codasip will work to bring the best in RISC-V technology to these companies and support them in reaching their fullest potential."*

About RISC-V

RISC-V (pronounced "risk-five") is an open, free ISA enabling a new era of processor innovation through open standard collaboration. Born in academia and research, RISC-V ISA delivers a new level of free, extensible software and hardware freedom on architecture, paving the way for the next 50 years of computing design and innovation.

About Codasip

Codasip delivers leading-edge processor IP and high-level design tools, providing ASIC designers with all the advantages of the RISC-V open ISA, along with the unique ability to automatically optimize the processor IP. As a founding member of the RISC-V Foundation and a long-term supplier of LLVM and GNU-based processor solutions, Codasip is committed to open standards for embedded processors. Formed in 2006 and headquartered in Brno, Czech Republic, Codasip currently has offices in the US and Europe, with representatives in Asia and Israel.
